Product data sheet

Item number: 551030

Bulk Cellular glass gravel CG-SGS 10/50

as a light, draining levelling layer for intensive greening and paved areas

Technical data	
Material	Cellular glass gravel
Grain size	approx. 10–50 mm
Weight dry, loose	approx. 200 kg/m ³
Weight compacted, water-saturated	approx. 350 kg/m ³
Water permeability	≥ 600 mm/min
pH value	7,0 – 8,0
Frost resistant	yes
Delivery form	in big bag or loose
Quantity	Depending on the order volume

Suggested tender text:

ClimaGruen cellular glass gravel CG-SGS 10/50 as a light, draining levelling layer for intensive greening and paved areas, supply and install to the naturally compacted layer height of ____ cm."

Material cellular glass gravel, weight dry-loose approx. 200 kg/m³, weight compacted-water-saturated approx. 350 kg/m³, water permeability ≥ 600 mm/min, pH value 7,0 – 8,0. The compaction factor is generally approx. 1,3.
